

Problem Solvers: XTech's IP54 Rated Extruded Aluminum Enclosures

For Immediate Release, 1/12/2012: [XTech's](#) standard offering of tech boxes that use a rubber gasket provide [IP54 level protection](#) for your electronics in challenging environments such as the factory floor, or outside mounting. Backed by extensive testing - XTech's IP54 enclosures are constructed for indoor/outdoor use, provide protection to personnel against access to hazardous parts, and provide a degree of protection against foreign objects and water. For a detailed test report visit our [White Papers page](#).

From an outdoor GPS unit to a surveillance camera in the corner of a dusty shipping dock, XTech enclosures can protect your electronics.

Utilizing our family of standard enclosure profiles - customers can quickly create their own prototypes and demo units with confidence. Standard enclosures are available now online via [XTech Direct](#), CBT Technology's online store. For production requirements, CBT Technology's application engineers can assist in customizing the solution - adding finishing, labeling, custom sizes and mounting, as well as addressing IO requirements. In addition - our engineering team will work with you to test the custom design for the final product's IP rating.

For more information - visit our new [IP54 Enclosure](#) page. To receive a sample, click on the image of the IP54 enclosure you want and find the link, "Request a free sample."
